

The National Association of Dental Laboratories is governed by a Board of Directors dedicated to the betterment of the dental laboratory profession. The Board of Directors, both past and present, is comprised of a group of committed volunteers who fervently give their time to a brighter future. NADL and the entire dental laboratory profession is in a better place because of their leadership and generosity. While we can never thank them enough for their altruism, we hope to always remember the impact they made on the profession. Thank you to all who have served!
